

# Concur Invoice Connector

Codeless Platforms' Concur Invoice Connector is an out-of-the-box product that uses BPA Platform to create PO invoices in your ERP system when a PO invoice payment request workflow has been completed in the SAP Concur invoice software. This then enables the workflow to be automatically extended from Concur Invoice into an ERP system whereupon the invoice payment process can then be completed.

## What is included in the Concur Invoice Connector?

Automated PO invoices straight out of the box

### ? What does the Concur Invoice Connector do?

The Concur Invoice Connector uses BPA Platform to automatically transfer purchase invoices from SAP Concur to ERP systems from vendors such as Epicor, Microsoft Dynamics, Sage and SAP.

This means that clients that use Concur Invoice to track their requisition process can, following the PO approval process, benefit from automatically creating PO invoices in their ERP system for payment.

The Concur Invoice Connector enables users to automatically create purchase invoices in a company's ERP system that relate to purchase requisitions/orders created in Concur Invoice that have a goods receipt note logged against them and have completed a Concur Invoice supplier workflow.

These purchase orders may or may not have been through a value-based approval process in Concur Invoice and have a supplier payment reference against them, the details of which will be used to produce the invoice in an ERP system. Typically, this synchronous activity of creating invoices into an ERP system is carried out every 24 hours.

Note: Customisation and extra tasks are available on request, for an additional fee.

### Pricing

Tier (Invoices processed per month)	Monthly Fee (Billed annually in advance)
1. 0-100	£200.00
2. 101-250	£270.00
3. 251-500	£315.00
4. 501-1500	£375.00
5. 1501-2500	£425.00
6. 2501-3500	£550.00
7. 3501-5000	£625.00
8. 5000+	POA

### i Features of the connector

- Integration with ERP systems
- Automatically transfer PO invoices from Concur Invoice
- Task performed every 24 hours
- Two day delivery time for deployment

### 👍 Benefits of the connector

- Eradicate repetitive data entry and human errors
- Automate the creation of PO invoices in ERP systems
- Reduce operational costs
- Improve efficiency and profits

## Connecting to your current systems

Codeless Platforms can **connect to practically any data source** via ODBC, OLEDB, Web Services or an **extensive range of supported 3rd party APIs** through connectors.

Just a few of our development accreditations...

## What versions and operating systems are supported?

BPA Platform is Windows-based software, utilising a true three-tier client server model over TCP/IP, with a multi-threaded server running as a Windows Service. It can run in 32-bit and 64-bit environments and can communicate with both 32- and 64-bit external systems. The Client provides all administrative and Task design capabilities, while the Server provides the client connectivity and manages the processing of Tasks.

### Supported operating systems

- Microsoft Windows 2012 Server / R2
- Microsoft Windows 2016 Server 64-bit
- Microsoft Windows 2019 Server 64-bit
- Microsoft .NET Framework 4.7.2

### Minimum hardware spec

- Dual 2Ghz Processor Cores
- 4 GB of available memory
- 1.5 GB available Disk space
- 1280x1024 desktop

## Learn more about Codeless Platforms

We have over 20 years' experience producing integration, automation and application building platforms. 7500+ customers and 450+ partners globally position us as a reputable vendor in the SMB marketplace.
